

FACTSheet

WESTERN AREA POWER ADMINISTRATION

WAPA serves Texas

Western Area Power Administration is one of four power marketing administrations within the Department of Energy that markets and transmits wholesale electricity. Its service area encompasses a 15-state region of the central and western U.S. where its 17,326-circuit-mile transmission system carries electricity from 57 hydroelectric powerplants. WAPA sells power to preference customers who in turn provide retail electric service to more than 40 million Americans.

Powerplants and FY19 net generation (GWh):

Amistad: 99
Falcon: 60

Types of customers:

Power marketers: 2
Cooperatives: 1

Projects:

Falcon-Amistad Project

The Falcon-Amistad Project consists of two international dams located on the Rio Grande River between Texas and Mexico. The power output is divided evenly between the two nations.

Loveland Area Projects

The Loveland Area Projects include the Fryingpan-Arkansas Project and the Pick-Sloan Missouri Basin Program—Western Division for marketing and rate-setting purposes.

Pick-Sloan Missouri Basin Program—Eastern Division

Seven mainstem dams and powerplants on the Missouri River produce hydroelectric power for the Eastern Division of the Pick-Sloan Missouri Basin Program.

WAPA wholesale rates vs. Texas retail rates
